Total weight: 120 ± 10 gsm

Whiteness: >85

Temperature range: Minus 5°C to plus 45°C

Outdoor durability: 6 months

Application Data

Product is designed for use on the range of Eco-Solvent and Latex printers, however we would recommend a small test run for your application to check suitability. We can offer profiles to help you get the best out of our media, please contact the sales offices for details on RIP's supported.

Always use edge guides with the media to keep media flat during printing. Always use the take up or tension bar when printing, this is especially important for the HP Latex printers.

Butterfly is supplied on a release liner, this should be removed after printing and before final finishing.

Ensure ink is dry completely before any cutting, stitching or sewing is started.

It is suitable for cold cutting, but always use a sharp blade to avoid fibres and dusty edges.

All technical information is based on manufacturer's claims and is believed to be true at time of print but does not constitute a warranty. Due to the complexity of end use the purchaser should carefully consider the fitness and performance of the product for their own application or use.

We reserve the right to make changes to specifications without prior notice.
